## StartTime II Starting system

### StartTime II

The Startime II is our latest generation acoustic start system.

The compact design of the unit houses the loudspeaker and the optical flash. The Startime II should be positioned where the athletes can see the flash. An additional external flash can be connected to the unit, and positioned where it is most required.

The speaker output allows a chain of loudspeakers to be connected, so as to deliver the start signal as close to each athlete as possible, so that they all hear the start simultaneously.

The microphone unit enables the starter to give the start signal and also amplifies the verbal commands. The relative volumes of the spoken command and the start signal are controlled by individual controls on the main unit.

Two LED's on the microphone show the status of the device; one signals whether the unit is powered, the other shows whether a connected timing system is 'armed' ready to receive a start.

The 'Ready' signal affords a high level of security to the timing system operator. This can be controlled from the control room, to inform the starter when they are ready for a start.

Article number	3399.900
Low battery alarm	yes
Autonomy of batteries	thousands of starts
Certification	CE standard specifications
Dimensions	400 x 200 x 160 mm
Weight	8.6 kg with charger and microphone
Microphone cable	10 m
Protection	IP41
Storage temperature	-20°C to +65°C
Working temperature	-10°C to +65°C
Relative humidity	(20% - 80%) without condensation
Operating manual	3399.502
Connections	microphone, Ares 21, flashes, speakers, charger

#### Auxiliary flash

3399.951

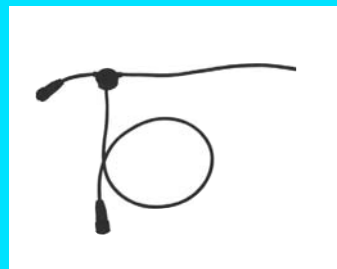

Optical signalling device for the start. Connected directly to the Startime II, and positioned poolside wherever required.

#### External loudspeaker

2850.712

For mobile installations. To be positioned near each starting block so that all swimmers hear the start simultaneously.

#### Harness for 2 loudspeakers

3399.903

Harness cable used to link the Startime II to the loudspeakers. Harness cables :

3399.904 Harness for 4 loudspeakers

3399.905 Harness for 5 loudspeakers

3399.906 Harness for 6 loudspeakers

3399.908 Harness for 8 loudspeakers

3399.910 Harness for 10 loudspeakers

## Top features

- Self contained
- Incorporating visual flash signal
- Built-in loudspeaker
- Reduced delay in sound
- Easy to use
- High security level
- Battery powered
